

Animal Health Line

Il nostro Reparto di Ricerca & Sviluppo offre soluzioni avanzate e sicure per gli allevatori

DIPPING PRO

CONCENTRATED TEAT DIP

Protects udder health and significantly reduces the incidence of mastitis, ensuring animal welfare and productivity.

MAXIMUM HYGIENE DURING MILKING

BENEFITS:

- **Maintains udder hygiene**, preventing milk contamination.
- **Tested and compliant with European** safety and quality standards.
- **Easy to apply** and safe for frequent use.
- **Natural components** that respect animal health and the environment.
- **Prolonged action** until the next milking.
- **Maximum reliability in milking systems.**

PRODUCT DATA SHEET

DIPPING PRO FOR UDDER HYGIENE AND PROTECTION DURING MILKING

Product Barcode/EAN:

DIPPING PRO is a transparent liquid concentrate designed to ensure udder hygiene and protection during milking. Using the exclusive SynthAg technology, based on clusters of colloidal silver ions, the product provides excellent antibacterial and antifungal protection. This innovative formulation not only prevents bacterial proliferation during milking but also helps preserve the microbiological integrity and quality of milk while safeguarding animal health.

PRODUCT COMPOSITION

DIPPING PRO is an advanced product developed to ensure optimal hygiene and targeted protection during milking. The patented SynthAg technology, based on clusters of colloidal silver ions combined with hydrogen peroxide and fast-acting alcohols, ensures highly effective disinfection. The inclusion of humectants and pH regulators helps maintain skin hydration and ensures the chemical and physical stability of the formulation.

INGREDIENTS: Aqua, Vegetable Glycerin, Hydrogen Peroxide, Propylene Glycol, Citric Acid, Isopropyl Alcohol, Colloidal Silver (SynthAg Technology).

APPLICATION FIELDS

Recommended for udder hygiene in livestock and veterinary use.

Compatible with both manual and automated application systems.

USAGE INSTRUCTIONS

Preparation: Dilute the concentrate 200–300 times with distilled water.

Pre-treatment: Thoroughly clean the udder and disinfect the teats.

Application: Dip the teats in the solution immediately after milking.

Dosage: Use the recommended amount to ensure full coverage.

Action: Leave the solution on until the next milking.

Monitoring: Regularly check the effectiveness of the treatment.

STORAGE

Store in a cool, dry place away from heat sources and direct sunlight.

PRECAUTIONS

Avoid contact with eyes. In case of contact, rinse thoroughly with water. Keep out of the reach of children. Use exclusively on dairy animals.

ADDITIONAL INFORMATION

The product complies with European safety and quality standards. Individual sensitivity to components may occur. **This is not a medicinal product.**

APPEARANCE

Clear, transparent fluid.

AVAILABLE FORMATS

Canister: 10 kg, 20 kg

Drum: 200 kg

IBC: 1000 kg

DIPPING PRO – The essential solution for udder health and milk quality.
